Education

University of Mumbai - Thadomal Shahani Engineering College — Mumbai, India
Bachelor of Engineering, Computer Engineering; GPA: 9.45/10 — *Aug. 2019 – Jun. 2023*

Experience

JPMorgan Chase & Co. — Mumbai, India
Software Engineer II | React.js, Spring Boot, SQL Server, AWS, Kafka — *Jan. 2026 – Present*

- Building a strategic client-facing platform providing a consolidated real-time view of risk and service performance across 18+ lines of business, empowering ultra-high-net-worth clients, operations and sales teams
- Delivered 25+ operational and service-performance metrics end-to-end, improving root-cause visibility and enabling faster issue detection across cross-functional stakeholders
- Modernizing a 40-year legacy mainframe application into a hybrid-cloud, event-driven architecture, establishing Kafka-based data pipelines that serve 20+ downstream regulatory applications
- Contributed to an AI-powered incident response system using JPMC's SmartSDK and Model Context Protocol (MCP) to coordinate specialized agents for email analysis, incident classification, code generation, and code review.

Software Engineer I | Java, SQL, Pentaho, Unix, Agile — *Aug. 2023 – Dec. 2025*

- Led end-to-end APAC regulatory programs like SEBI CEM and Hong Kong ELI, delivering annual savings of 250 person-days
- Reduced report generation time by 90%, automating five complex, end-to-end regulatory reports for the APAC region. Streamlined operations by eliminating weeks of manual effort per report cycle to under an hour

Software Engineer Intern | React.js, Redux, Spring, SQL, Agile — *Jun. 2022 – Jul. 2022*

- Migrated a multi-page application interface for the operations' dashboard of *Margin and Collateral Services*, from Ext JS to React.js
- Utilized the in-house JPMC's UI Toolkit, decommissioned the monolith legacy code into functional micro-frontend architecture

Projects

DeepRacer Off The Spot | *Python, Shell, AWS*

- Engineered a lightweight solution to automate manual tasks in AWS Console, featuring waypoint detection, plagiarism checking, resource deletion, reducing operational overhead for AWS DeepRacer organisers from one week to a few hours
- Contributed to JPMC *SEPathon 2024* with an open-source solution under GPL-3.0, delivering a parody-inspired utility to enhance accessibility and efficiency in AWS DeepRacer workflows

ScanRE | *React.js, Vite, Flask, semgrep, ORT, GPT-4* | GitHub, Demo

- Built a Static Code Analysis Toolkit for vulnerability detection, integrated with GPT-4 for vulnerability mitigation suggestions
- Scanned 3000+ open-sourced GitHub repositories and 1000+ Android applications, reporting 12,000+ potential vulnerabilities in applications used by millions, majority of them are successfully patched

Aankh | *React.js, Express.js, MongoDB, OpenCV, TensorFlow, Flask* | GitHub

- Built an ML-based automated proctoring system, with features like face verification, multiple people detection, multi-tab check
- Offers a 76% cost-effective pricing model, by providing an accessible admin dashboard to monitor user warning logs and statistics

Blurrit | *JavaScript, CSS* | GitHub, Web Store

- Published a lightweight (<10KB) web extension to blur private data on WhatsApp Web, garnering around 250 daily active users

Leadership and Achievements

Community Work | experience.tusharnankani.com

- Spearheading JPMC's *Ignite Web Development* as a Community Lead, driving creative initiatives and fostering collaboration
- Mentored the JPMC's *GenerationTech for Good 2024-25* for young underprivileged students to spark an interest in STEM
- Led TSEC CodeCell, organizing 3 editions of *TSEC Hacks (2021-23)* for a cumulative of 800+ in-person participants
- Impacted 1750+ people in 15+ talks and workshops at various technical meetups and conferences across the city

Achievements

- Winner at the JPMC *AI/ML Bakeoff 2025* (100+ teams) for building a Incident Response System using multi-agent orchestration
- Winner at the JPMC *SEPathon 2024* (30+ teams) for building *DeepRacer off the spot* utility for the AWS DeepRacer annual event
- Winner (Cybersecurity Track) – MumbaiHacks'23, Google Developer Groups, Mumbai (100+ teams), receiving Rs. 100,000 ($1200)
- Received the prestigious *Principal's Award of Excellence* (top 1%) – for well-rounded contributions to the batch of 2019-23
- First runners-Up – Code For Good'21 (100+ teams), Winner – First Post-Trade Tech Hackathon (10+ teams), at JPMorgan Chase & Co
